Q9. How do Archaeological sources help in the study of history?

Q10. Read the extract and answer the questions that follow.

The environment is made up of all living and non-living things that occur naturally on Earth. These include air, water, soil, plants, and animals. Humans interact with their environment in many ways, often leading to both positive and negative impacts. Deforestation, pollution, and over-exploitation of resources are some of the harmful activities that cause damage to the environment. However, efforts like afforestation and pollution control measures can help restore the environment.

1. The environment consists of both living and _____ components.
2. Name two harmful human activities that affect the environment.
3. What is one way to help restore the environment?
4. What is the role of afforestation in environmental protection?
