(Session 2025-26)

Assignment –(May)

Topic- Animal Sense And Behaviour

Class -V

Subject:EvS

Q1 Read the following paragraph and answer the questions:

Animals have special senses that help them survive in their environment. Some animals have strong hearing, like bats, while others have a great sense of smell, like dogs. Many animals use these senses to find food, avoid danger, and communicate. For example, bees dance to tell other bees where flowers are, and birds migrate using the Earth's magnetic field. These behaviours help animals live safely and successfully in their habitats.

1. How do animals use their senses to find food?
2. Why do bees dance?
3. What helps birds to migrate?

Q2 Fill in the blanks:

- 1) Owls are active at.....
- 2) Whales and dolphins locate their food through.....
- 3) Ants have a pair of on their head.

Q3 Give one word answer:

- 1)The process of transfer of energy,in the form of food through a series of organisms.
- 2) A nocturnal animal

Q4.Value based question:

Riya was throwing stones at a group of birds resting on a tree. Her friend told her that birds need peace to use their senses to stay safe and find food. What should Riya do, and why is it important to respect animals and their senses?
